

Upland Wildlife Habitat Management

PRACTICE INTRODUCTION

USDA, Natural Resources Conservation Service - practice code 645

DEFINITION

Upland Wildlife Habitat Management is creating, maintaining, or enhancing areas of food and cover for upland wildlife.

PRACTICE INFORMATION

The population dynamics of wildlife is highly dependent on food, water, and cover. The purpose of this practice is to enhance the

wildlife habitat and maintain or increase populations of wildlife species. The practice applies to all areas where wildlife need improvements in food, cover, and management.

Additional information including design criteria and specifications are in the local NRCS Field Office Technical Guide.
